ABOUT US

City Group started its journey in the tea business in 2007 by acquiring the first tea estate in Sreemangal within the Sylhet Division of Bangladesh. In 2014, City Group took another tea garden on lease. The tea developed its own quality over time with proper care and supervision by experienced managers and became popular amongst consumers for its extraordinary blending. Due to its massive demand, City Group acquired another tea estate by the year 2015. In 2021, the company acquired `Karnaphuli Tea Estate' and `Kodala Tea Estate' situated in the Chittagong region. In 2022, the group acquired two new tea gardens, Sreebari Tea Estate and Pallathal Tea Estate in the Sylhet region. The organic system of tea processing is the prime specialty here. To minimize environmental pollution, rice bran fuel is used to process tea instead of diesel, resulting in perfect aroma and flavor. From the beginning till now, City Group owns 8 tea estates comprising around 18,875 acres of land and is relentlessly working towards ensuring world-class tea leaf production.
